

MOVE COMMUNITY OUTREACH

AN IEEE★USA INITIATIVE

MOVE Update - 22 July 2016

Dear IEEE MOVE Volunteers;

Thank you for your interest in the MOVE Project, an IEEE USA Initiative. Many of you indicated your interest on our website move.ieeeusa.org. A new version of the website was recently unveiled.

Those of you who left a comment when signing up can expect a response shortly. Quite frankly, we are pleased but overwhelmed with the response.

Some of the general program areas we need immediate help with include:

- **communications**, including marketing, newsletter, etc.
- **fundraising** (you won't be alone on this. You will join a team of volunteers who will help identify opportunities and develop grants to fund the program well into the future.),
- **volunteer training**

Debris remaining after West Virginia floods

MOVE arriving in West Virginia

We will be planning additional training classes, STEM activities and public events in the coming weeks and months. Of course, we will always respond to disasters first.

If you wish to reach out with questions, suggestions, etc., please feel free to contact Mary Ellen Randall, MOVE Program Director, merandall@ieee.org or (919) 388-1776

June 26- July 13 MOVE was in West Virginia assisting with Red Cross Disaster Relief efforts. **Watch for a webex with details of this effort.**

We hope you followed our progress on Facebook at <https://www.facebook.com/ieeeusamove>. To help the program, please **like**, **share** and give us a **5 star rating**! You may also Donate there!

UPCOMING EVENTS

- July 26 Birmingham, AL MOVE on display for section members & friends <https://meetings.vtools.ieee.org/m/40523>
